## Projects

---

### City Sitters

Baby Sitter website layout designed for parents to post jobs and sitters to find work.

Technology: *handlebars, sequelize, express, node.js, passport.js(user authentication)*

### Fortnite Clicky Game

Memory game based on the popular online multiplayer game "Fortnite". Test your memory by clicking/eliminating all the character cards without clicking a character card twice.

Technology: *react.js*

### Moody News

News website that runs analysis on article titles to determine the general sentiment and provide users with a sentiment score for each article and average per news source.

Technology: *news API, sentimood package, jQuery, firebase*

### Durr Burger

Burger logger that follows the MVC design pattern to add and delete burgers.

Technology: *mySQL, express, node*

### Hack News Scrapper

A simple, easily navigable site that allows user to scrape current news article from Hacker News. Users can save, leave notes and delete articles based on their preference.

Technology: *express, handlebars, mongoDB, cheerio, morgan*

### bAmazon

Basic Amazon clone, app shows the customer what items bAmazon offers and then allows customers to place orders on the item they want to purchase.

Technology: *mySQL, prom package, terminal*

## Skills

---

### Programming Languages

Html, JavaScript, CSS

### Libraries & Frameworks

Express, React, Node, jQuery  
Handlebars

### Databases

MySQL, Mongo DB

### Tools

Version Control, NPM/Yarn,  
heroku

## Education/Training

---

### University of Pennsylvania

(March 2018 – October 2018)

24-Week MERN Full Stack Coding  
Boot Camp Course

### Bucks Community College

(2016 – 2018)

Pursuing Computer Science Degree  
Part-Time
